Dear Friends

The new Uganda Medicinal Plants app

Do you have a smartphone based on IOS or Android operating systems? If so, you may like to download the new “Uganda Medicinal Plants” application from the Google Play or Apple Store. It is free, but only from 6 to 13 June. After that you must pay a small fee. If you do not find it, go via your browser: <https://tinyurl.com/mg6lskt>. If you have Apple: <https://tinyurl.com/yasypm3q>.

This app gives details of 27 medicinal plants found in Uganda. It describes their cultivation and includes lots of information about their uses. It has been produced by Staf Lemmens and is based on the work of the late Monik Adriaens. Monik was a valued friend of mine, and of BioGardens and many farmers in the Kasese area of Uganda.

The Discover Homepage

Please keep an eye on our Discover homepage. We have posted many useful information sheets, see <http://discover-src.net/en/information/information-sheets/>. All past newsletters are here: <http://discover-src.net/en/information/from-africa/>.

Please keep me posted with your activities. We regularly update the NEWS page. See <http://discover-src.net/en/news/>.

The Tropical Natural Medicine Facebook page

Visit <https://www.facebook.com/discover.src/>. Send me pictures of yourself or your colleagues together with a medicinal plant. Tell me why you like that plant and what you use it for. I may then post it on this page for others to see and learn from.

Many greetings!

Keith Lindsey
