

Discover Newsletter – December 2024

Good news in 2024

Amidst constant bad news we must not forget that there are people all over the world whose aim it is to make the world a better place.

For example, Judith Nambi, a Primary School Teacher who founded a school near to Masaka in Uganda. During 2024 she visited 35 schools and planted 1500 tree seedlings

on the school compounds and gave the pupils a further 500 to plant and care for at home.

For example, Mpuuga Edigar, left in the picture, a Primary School Teacher in Wandegeya, near Mayuge, has enthused the teachers in 5 local schools, including a secondary school, to plant and care for trees.

For example, Robert Bwambale in Maliba near Kasese who has persuaded many farmers of the importance of trees both for reducing the negative impacts of climate crisis, and for improved productivity. That is now happening! As a result, they are constantly asking for more seedlings.

As a further encouragement, Robert recently held a training day for 74 farmers and, to their delight, gave each a pair of rubber boots.

As a further encouragement, Robert recently held a training day for 74 farmers and, to their delight, gave each a pair of rubber boots.

All our 15 African colleagues are extremely grateful for your support over the past few years. As a result of your generosity, in 2024 these highly motivated people have planted and distributed well over 30,000 tree seedlings. Their communities are now gratefully enjoying the many benefits from the trees they planted in previous years.

Please continue with your generous support for another year.

With our best wishes for a blessed Advent season,

Keith Lindsey and the Discover-Team
